

Mining, Metallurgy & Exploration (MME)

Instructions on Submitting Your SME Preprint Manuscript, v03.2

If you are a presenter at an SME Conference and have a preprint manuscript, we welcome its submission to the SME *Mining, Metallurgy & Exploration* journal. You may submit your manuscript to both the conference preprint USB and for peer review in the MME journal, provided it has not been previously published elsewhere. All manuscripts submitted to the journal will go through peer review by the MME Editorial Board; those manuscripts accepted by the Board are published in the journal.

To increase the chances of your manuscript being accepted for publication, write it in the form of a technical journal paper with all the elements of such a paper (Abstract, Introduction with literature review, Methods, Results, Discussion, Conclusion, References), ensuring all the elements are well covered. Consider MME's aims and scope, which are to publish high-quality original research publications, in-depth special review articles, reviews of state-of-the-art and innovative technologies and industry methodologies, communications of work of topical and emerging interest, and other works that enhance understanding on both the fundamental and practical levels.

To submit:

- Go to springer.com/42461
- Click on "Submission guidelines" to access the Instructions for Authors
- Click on "Submit manuscript" to submit. During submission, indicate in the Author Comments box that the submission is an SME conference preprint manuscript and state the conference name and date. Add an "Acknowledgments" section to your manuscript with the following text: "Data from this manuscript had been presented at the [insert conference name], [insert conference dates], held in [insert conference venue]." Do not say anywhere in your manuscript that it was published in a proceedings, as that would result in rejection.

There is no deadline for submission to the journal.

Why submit to MME?

- **Journal impact factor of 1.413 and coverage in Clarivate's Web of Science.**
- **Online First publication within 16-21 days of acceptance.**
- **No charge for publication.**
- **No restrictions on number of pages/figures.**
